## App Marketplace in Catena-X

In Catena-X, the marketplace is a platform where providers/vendors can come together to offer their products or services to a curated customer base. The role of a marketplace owner is to bring together the right vendors and the right customers to drive offers through an exceptional multi-vendor platform - offerer have a place to gain visibility and offer their products and users/consumers can get an easy and quick overview of available offers as well as finding easy what they are looking for.

The owner of the marketplace offered services is not the marketplace owner, it is the provider of the service itself. With that, the operation as well as the support is with the offer vendor itself. Catena-X has mainly in scope to promote, drive and connect.

## Service Marketplace in Catena-X

The service marketplace is used for service provider offerings to enable users to get access to infrastructure / core component services.

Similar like the app marketplace, only published services via the "Service Release Process" will be shown in the service marketplace.

Detail to the service marketplace will get added soon.

### App List (Browse)

CX Portal will enable the user to browse through the marketplace with different cross functional elements. The main item for marketplace browsing will be the app list, inside this list all apps available in the CX Network will be shown.

The user will have the chance to get details about the app as well as even subscribe for the app, if the user has the right permission.

If you like to find out more about app listing, please follow the following link [App Marketplace - App Overview](#)<sup>3</sup>

Beside the standard app list, we will enable the user to change the app list view to a grouped view sorted by the app use cases. As well as a own area for recommended / new apps. (not release 1 relevant)

<sup>3</sup> <https://confluence.catena-x.net/display/CORE/App+Marketplace+-+App+Overview>

## **App List (Search)**

Searching for the relevant needed apps is one of the key functions.

Within the first weeks and months of use, we will need to further define the search function and enhance/change the search where needed.

If you like to find out more about Search, please follow the following link: [App Marketplace - App Overview](#)<sup>4</sup>

## **App Service Consume / Access**

The App Subscription process is relevant for subscribe and usage of apps. For that, a workflow is implemented to support the customer / app provider app subscription process.

Follow the link to get more details: [App Subscription Function](#)<sup>5</sup>

## **App Release**

Publish apps via the app release process and manage your published apps.
