

App Marketplace - My Favorites

CUSTOMER

If the user clicks on the plus button, the app is added to the favorites. The plus button changes to a checkmark button. If the user clicks on the checkmark button again, the app is deleted from the favorites and the plus button appears again.

Functionality

The App favourite function is offered in the app marketplace to highlight an app easily and ensure that I as an user can quickly find the app again.

To use the function, the user can click on the plus button inside the app card. As soon as this is done, the app is added to the favorites. The plus button changes to a checkmark button. If the user clicks on the checkmark button again, the app is deleted from the favorites and the plus button appears again.

Inside the DB this information will get stored - the portal db will know which user has which favorite selected and can easily retrieve the information for the Front-End
