

App Marketplace - App Overview

CUSTOMER

Summary

The app marketplace is providing a list of software applications of catena-x approved app providers.

Beside the generic list, apps can get viewed in specific pre-configured views

- List View
- Category (Use Case) View

additionally user can select app details to display additional information for a specific selected app and mark apps as favorite (See Document “App Marketplace (MyFavorites)”

Implementation

#1 Get all active apps

API is used to display the active apps of the CX network based on the released apps. If an app is under review or creation, the app won't show up in this view.

Endpoint: GET /api/apps/active

Response

```
[
  {
    "id": "uuid",
    "title": "string",
    "shortDescription": "string",
