1 Interface / API / Service Summary

The membership discovery endpoint is used to display/retrieve all cx network members based on the bpm

2 Implementation

2.1 #1 CX Membership Discovery

The cx membership discovery endpoint can get triggered via technical as well as real users, if relevant roles are available.

For technical user, a company can request the user creation via [the link to technical user creation](#).

Endpoint: [Get api/administration/partnernetwork/memberCompanies](#)

Response structure

```
[  
  "string",  
  "string"  
]
```

the string response includes all bpn's of active network members

3 Open Tasks:

n/a
